Tackling health inequalities by improving the quality of housing

The quality and environmental context of housing is increasingly considered as being one of the main dimensions of environmental inequality. Housing conditions are one of the mechanisms by which social and environmental inequality translates into health inequality. Based on the evidence available, WHO has scaled up activities to address health inequities due to substandard housing conditions and has been developing new *Housing and Health Guidelines*. First draft recommendations focus on crowding, housing accessibility and safety, thermal comfort (i.e. heat and cold), energy affordability and transport within the residential environment. Other housing-related topics, such as water, sanitation and air quality will also be addressed. The Guidelines will be finalized in the second quarter of 2016. The WHO Guideline Development Group met on 13–15 July in Morges, Switzerland. For more information, click [here](#).

WHO Collaborating Centres Network for Children's Environmental Health

Children are especially vulnerable to physical, chemical and biological environmental threats. Environmental factors account for one third of the global disease burden in children. Therefore, it is necessary to strengthen global capacity for children's environmental health research and training to protect children's health around the world. WHO and its Collaborating Centres Network for Children's Environmental Health prioritize preventing disease and injury and promoting children's well-being through healthier environments. For more information, click [here](#).

UN-Habitat releases International Guidelines on Urban Territorial Planning

UN-Habitat has released guidelines to provide national governments, local authorities, civil society organizations and planning professionals with a global reference framework that promotes more compact, socially inclusive, better integrated and connected cities and territories that foster sustainable urban development and are resilient to climate change.

The International Guidelines on Urban and Territorial Planning serve both as a source of inspiration and a compass when reviewing, developing and implementing urban and territorial planning frameworks. The Guidelines will be soon available in 7 other languages: Arabic, Chinese, French, Persian, Russian, Spanish and Vietnamese. The Habitat guidelines are accessible at <http://unhabitat.org/un-habitat-releases-international-guidelines-on-urban-territorial-planning/> together with a compendium of inspiring practices.

Public consultation on the EU Energy Performance of Buildings Directive

This public consultation launches the review of the directive, which is due by the end of 2016. The consultation forms one part of the evaluation of the Energy Performance of Buildings Directive. The evaluation should reflect the experience gained and progress made since the adoption of the Directive. If necessary, the European Commission should make proposals on the basis of the evaluation. Further details on the public consultation are available at <https://ec.europa.eu/energy/en/consultations/public-consultation-evaluation-energy-performance-buildings-directive>.

Literature

In this section we will provide a collection of recent housing and health publications from a variety of backgrounds. Literature published in German or French, respectively, is indicated with the German flag  or the French flag .

Allergies and Respiratory Diseases

Risk factors for asthma: is prevention possible?

Beasley R, Semprini A, Mitchell EA.
Lancet. 2015 Sep 12;386(9998):1075-85. [Review](#).

The association of respiratory symptoms and indoor housing conditions among migrant farmworkers in eastern North Carolina.

Kearney GD, Chatterjee AB, Talton J, Chen H, Quandt SA, Summers P, Arcury TA.
J Agromedicine. 2014;19(4):395-405. [Free Article](#).

Exposure to household endotoxin and total and allergen-specific IgE in the US population.

Min KB, Min JY.
Environ Pollut. 2015 Apr;199:148-54.

Indoor Fungal Exposure and Allergic Respiratory Disease.

Osborne NJ, Thornton CR, Sharpe RA.
Curr Allergy Asthma Rep. 2015 Dec;15(12):71.

Eczema and indoor environment: lessons from the International Study of Asthma and Allergies in Childhood (ISAAC) Phase 2.

Tsakok T, Weinmayr G, Jaensch A, Strachan DP, Williams HC, Flohr C; ISAAC Phase 2 Study Group.
Lancet. 2015 Feb 26;385 Suppl 1:S99.

Indoor Air

Semivolatile organic compounds in homes: strategies for efficient and systematic exposure measurement based on empirical and theoretical factors.

Dodson RE, Camann DE, Morello-Frosch R, Brody JG, Rudel RA.
Environ Sci Technol. 2015 Jan 6;49(1):113-22. [Free Article](#).

Assessment of indoor environmental quality in existing multi-family buildings in North-East Europe.

Du L, Prasauskas T, Leivo V, Turunen M, Pekkonen M, Kivistö M, Aaltonen A, Martuzevicius D, Haverinen-Shaughnessy U.
Environ Int. 2015 Jun;79:74-84.

Characterizing the peroxisome proliferator-activated receptor (PPAR γ) ligand binding potential of several major flame retardants, their metabolites, and chemical mixtures in house dust.

Fang M, Webster TF, Ferguson PL, Stapleton HM.
Environ Health Perspect. 2015 Feb;123(2):166-72. [Free Article](#).

Concentrations of polycyclic aromatic hydrocarbons in resuspendable fraction of settled bus dust and its implications for human exposure.

Gao P, Liu S, Feng Y, Lin N, Lu B, Zhang Z, Cui F, Xing B, Hammond SK.
Environ Pollut. 2015 Mar;198:1-7.

Personal day-time exposure to ultrafine particles in different microenvironments.

Gu J, Kraus U, Schneider A, Hampel R, Pitz M, Breitner S, Wolf K, Hänninen O, Peters A, Cyrys J.
Int J Hyg Environ Health. 2015 Mar;218(2):188-95.

Levels of polybrominated diphenyl ethers and novel flame retardants in microenvironment dust from Egypt: an assessment of human exposure.

Hassan Y, Shoeib T.
Sci Total Environ. 2015 Feb 1;505:47-55.

Monitoring indoor exposure to organophosphate flame retardants: hand wipes and house dust.

Hoffman K, Garantziotis S, Birnbaum LS, Stapleton HM.
Environ Health Perspect. 2015 Feb;123(2):160-5.

Personal and indoor PM_{2.5} exposure from burning solid fuels in vented and unvented stoves in a rural region of China with a high incidence of lung cancer.

Hu W, Downward GS, Reiss B, Xu J, Bassig BA, Hosgood HD 3rd, Zhang L, Seow WJ, Wu G, Chapman RS, Tian L, Wei F, Vermeulen R, Lan Q.
Environ Sci Technol. 2014;48(15):8456-64.

Characterizing distribution, sources, and potential health risk of polybrominated diphenyl ethers (PBDEs) in office environment.

Li Y, Chen L, Wen ZH, Duan YP, Lu ZB, Meng XZ, Zhang W.
Environ Pollut. 2015 Mar;198:25-31.

Indoor air quality in Portuguese schools: levels and sources of pollutants.

Madureira J, Paciência I, Pereira C, Teixeira JP, Fernandes EO.

J Epidemiol Community Health. 2015 Oct 12. pii: jech-2015-205925. [Epub ahead of print]

Noise

[Short-term exposure to noise, fine particulate matter and nitrogen oxides on ambulatory blood pressure: A repeated-measure study.](#)

Chang LT, Chuang KJ, Yang WT, Wang VS, Chuang HC, Bao BY, Liu CS, Chang TY.
Environ Res. 2015 Jul;140:634-40.

[Road Traffic and Railway Noise Exposures and Adiposity in Adults: A Cross-Sectional Analysis of the Danish Diet, Cancer, and Health Cohort.](#)

Christensen JS, Raaschou-Nielsen O, Tjønneland A, Overvad K, Nordsborg RB, Ketzel M, Sørensen TI, Sørensen M.
Environ Health Perspect. 2015 Aug 4. [Epub ahead of print]

Framing sound: Using expectations to reduce environmental noise annoyance.

Crichton F, Dodd G, Schmid G, Petrie KJ.
Environ Res. 2015 Oct;142:609-14.

Does exposure to aircraft noise increase the mortality from cardiovascular disease in the population living in the vicinity of airports? Results of an ecological study in France.

Evrard AS, Bouaoun L, Champelovier P, Lambert J, Laumon B.
Noise Health. 2015 Sep-Oct;17(78):328-36.

Traffic-Related Air Pollution, Noise at School, and Behavioral Problems in Barcelona Schoolchildren: A Cross-Sectional Study.

Forns J, Dadvand P, Foraster M, Alvarez-Pedrerol M, Rivas I, López-Vicente M, Suades-Gonzalez E, Garcia-Estebe R, Esnaola M, Cirach M, Grellier J, Basagaña X, Querol X, Guxens M, Nieuwenhuijsen MJ, Sunyer J.
Environ Health Perspect. 2015 Aug 4. [Epub ahead of print]

Exposure to Road Traffic Noise and Behavioral Problems in 7-Year-Old Children: A Cohort Study.

Hjortebjerg D, Andersen AM, Christensen JS, Ketzel M, Raaschou-Nielsen O, Sunyer J, Julvez J, Forns J, Sørensen M.
Environ Health Perspect. 2015 Jun 30. [Epub ahead of print]

The effects of a hearing education program on recreational noise exposure, attitudes and beliefs toward noise, hearing loss, and hearing protector devices in young adults.

Keppler H, Ingeborg D, Sofie D, Bart V.
Noise Health. 2015 Sep-Oct;17(78):253-62.

Hearing in young adults. Part I: The effects of attitudes and beliefs toward noise, hearing loss, and hearing protector devices.

Keppler H, Dhooge I, Vinck B.
Noise Health. 2015 Sep-Oct;17(78):237-44.

Hearing in young adults. Part II: The effects of recreational noise exposure.

Keppler H, Dhooge I, Vinck B.
Noise Health. 2015 Sep-Oct;17(78):245-52.

Individual daytime noise exposure in different microenvironments.

Kraus U, Breitner S, Hampel R, Wolf K, Cyrys J, Geruschkat U, Gu J, Radon K, Peters A, Schneider A.
Environ Res. 2015 Jul;140:479-87.

Simultaneous effects of noise exposure and smoking on OAEs.

Mehrparvar AH, Mollasadeghi A, Hashemi SH, Sakhvidi MJ, Mostaghaci M, Davari MH.
Noise Health. 2015 Jul-Aug;17(77):233-6.

The effect of wind turbine noise on sleep and quality of life: A systematic review and meta-analysis of observational studies.

Onakpoya IJ, O'Sullivan J, Thompson MJ, Heneghan CJ.
Environ Int. 2015 Sep;82:1-9.

Health Effects of Noise Exposure in Children.

Stansfeld S, Clark C.
Curr Environ Health Rep. 2015 Jun;2(2):171-8.

Miscellaneous

[Traffic-related air pollution and the onset of myocardial infarction: disclosing benzene as a trigger? A small-area case-crossover study.](#)

Bard D, Kihal W, Schillinger C, Fermanian C, Ségala C, Glorion S, Arveiler D, Weber C. PLoS One. 2014 Jun 16;9(6):e100307. [Free Article.](#)

[Influence of advections of particulate matter from biomass combustion on specific-cause mortality in Madrid in the period 2004-2009.](#)

Linares C, Carmona R, Tobías A, Mirón IJ, Díaz J. Environ Sci Pollut Res Int. 2015 May;22(9):7012-9.

[Wood burning stoves produce PM2.5 particles in amounts similar to traffic and increase global warming.](#)

Robinson DL. BMJ. 2015 Jul 14;351:h3738.

[In-vehicle exposures to particulate air pollution in Canadian metropolitan areas: the urban transportation exposure study.](#)

Weichenthal S, Van Ryswyk K, Kulka R, Sun L, Wallace L, Joseph L. Environ Sci Technol. 2015 Jan 6;49(1):597-605.

[Nitrogen dioxide is linked to 5900 deaths a year in London, report says.](#)

Event Announcements

2015

6. Innenraumtag des Arbeitskreises Innenraumluft

Ministerium für ein lebenswertes Österreich (BMLFUW)

24. November 2015

Vienna, Austria

Further Information: [6. Innenraumtag 2015](#)

Nanotechnology based sensors and detection methods - workshop

December 1–2, 2015

Ispra, Italy

Further Information: [Nanotechnology based sensors and detection methods - workshop - JRC Science Hub - European Commission](#)

2016

53rd International Making Cities Livable Conference

June 13-17, 2016

Roma, Italy

Further Information: [53rd Conference | International Making Cities Livable](#)

14th International Conference on Indoor Air Quality and Climate

July 3–8, 2016

Ghent, Belgium

Further Information: [Indoor air 2016 |](#)

17th IUAPPA World Clean Air Congress - Mega-City Perspectives

August 28 – September 2

Busan, South Korea

Further Information: [IUAPPA 2016](#)

41st IAHS World Congress on Housing

September 13–16, 2016

Algarve, Portugal

Further Information: [IAHS2016](#)

ROOMS 2016 meeting

October 6-7, 2016

Concarneau, France

Further Information: Not available yet

Message Board

In this section we will inform you about activities and projects related to housing and health that are being carried out by WHO or the WHO CC. This may relate to ongoing activities and projects, as well as invitations to participate in data collections or case study projects.

WHO work on indoor, built and urban environments**WHO report on environmental inequalities in the Kosovo region**

Drawing on data from a larger UN project, this report gives a first assessment of the scale of environmental inequalities in the two municipalities of Obiliq/Obilić and Fushë Kosovë/Kosovo Polje, and the role of socioeconomic, demographic, spatial and ethnic determinants in creating these inequalities. The analysis is based on a field survey and focuses on environmental vulnerabilities in relation to housing, water/hygiene/sanitation, environmental conditions and affordability constraints. The findings show marked inequalities in environmental disadvantage, with the greatest inequalities being associated with socioeconomic and ethnic determinants. Yet, spatial and demographic determinants also play a role.

The report presents a range of examples of the variability of environmental inequalities and vulnerabilities, and shows various examples on how environmental inequality and vulnerability can be assessed in methodological terms.

The report is available [here](#) and Serbian and Albanian versions will be launched in November.

WHO World Report on Ageing and Health launched

The World Report on Ageing and Health presents a status quo assessment that addresses the relationship between ageing and health and the various requirements for age-friendly societies and environments, including adequate housing conditions. The report finds that comprehensive public health action on population ageing is urgently needed. This will require fundamental shifts, not just in

the things we do, but in how we think about ageing itself. The World report on ageing and health outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. Making these investments will have valuable social and economic returns, both in terms of health and wellbeing of older people and in enabling their on-going participation in society.

The report can be accessed [here](#).

International lead poisoning prevention week of action

The World Health Organization (WHO) is preparing for the third International lead poisoning prevention week of action, with the elimination of lead paint as the theme. Lead exposure, particularly in childhood, can result in lifelong negative health impacts, including impaired cognitive development. No safe level of exposure to lead has been identified. The elimination of leaded gasoline in most countries has contributed to a significant reduction in exposure, as shown by declining mean population blood lead concentrations in those countries. However, lead paint remains an important source of exposure for children and workers in many countries.

A recent survey conducted by WHO and the United Nations Environment Programme (UNEP) on behalf of the Global Alliance to Eliminate Lead Paint, found that more than 65 countries do not have legally binding controls on lead in paint. Market surveys in some of these countries have shown that paint containing large quantities of lead remain on sale to the public. More action is needed by governments to phase out lead paint. The campaign will take place 25–31 October 2015.

For more information on the International lead poisoning prevention week of action, click [here](#).

UN Sustainable Development Summit 2015: adoption of SDGs

In late September, the UN Sustainable Development Summit adopted the new sustainable development agenda that proposed the so-called SDGs (Sustainable Development Goals). There are 17 SDGs with 169 targets to be achieved by 2030. Various goals and targets relate directly to healthy urban and built environments, such as e.g. SDG 6 (water/sanitation), SDG 7 (access to sustainable energy), or SDG 11 (cities and human settlements). More information on health-relevant SDGs can be found on the [WHO website](#) while a general overview of the summit and the adopted SDGs is available at the [UN site](#).

World Habitat Day

The United Nations has designated the first Monday of October of every year as World Habitat Day. The purpose of World Habitat Day is to reflect on the state of our towns and cities, and on the basic right of all to adequate shelter. It is also intended to remind the world that we all have the power and the responsibility to shape the future of our cities and towns. The theme for World Habitat Day 2015 is *Public Spaces for All*.

Streets and public spaces have often been overlooked and undervalued, but are increasingly being considered the backbone of cities. Public spaces are places which are accessible and enjoyable by all without a profit motive and take on various spatial forms, including parks, streets, sidewalks, markets and playgrounds. In 2011, UN-Habitat adopted resolution on sustainable urban development through access to quality urban public spaces. Good public spaces enhance community cohesion and promote health, happiness, and well-being for all citizens as well as fostering investment, economic development and environmental sustainability.

For further information on World Habitat Day, click [here](#).
